TO WHOM IT MAY CONCERN.

Notice is hereby given that the board of County Commissioners of Lincoln county, Nevada, will, at their meeting to be held Monday, October 4th, 1909, receive sealed bids for the sale to the county of forty tons of good lump coal for use at the county court house. Said bids to include the delivery of said coal by the successful bidder to the court house. All bids must be filed with the county clerk of Lincoln county on or before 10 a. m., Monday October 4th, 1909.

The Board of County Commissioners reserves the right to reject any and all bids submitted under this notice.

LEGAL NOTICES.

By order of the Board,

WM. E. ORR,
Clerk.

First pub. Sept. 11; last Oct. 2.

TO WHOM IT MAY CONCERN.

Notice is hereby given that the assessment roll in and for Lincoln county for the year 1909, has been delivered to me by the assessor; and the same is now in my office for the inspection of any and all caring so to do.

The board of county commissioners of Lincoln county, Nevada, will meet at a board of equalization on Monday, the 20th day of September, 1909, and will continue in session from time to time until the first Monday in October, 1909, unless otherwise ordered as is provided by law.

WM. E. ORR,

County Clerk and ex-Officio Clerk of the Board of County Commissioners.

Notice of Dissolution.

Notice is hereby given that the partnership heretofore existing between Charles DesMazes and Charles Hagerty, under the firm name of DesMazes & Hagerty, of Pioche, Nevada, has this day been dissolved, the said Charles Hagerty retiring.

All debts contracted by said firm of DesMazes & Hagerty will be settled by the said Charles DesMazes.

Signed: CHARLES DESMAZES,
CHARLES HAGERTY.

Dated Pioche, Nevada, September 1, 1909.

First pub. Sept. 11; last, Oct. 2.

NOTICE TO CREDITORS.

In the District Court of the Fourth Judicial District, in and for the County of Lincoln, State of Nevada.

In the matter of the Estate of George Firman Baker, deceased.

Notice to Creditors. No. 230.

Notice is hereby given that the undersigned has been duly appointed and qualified by the District Court of the Fourth Judicial District, as administrator with the will annexed of the Estate of George Firman Baker, late of said county, deceased. All creditors having claims against said estate are required to file the same, with proper vouchers attached, with the clerk of the court, within three months of the first publication of this notice.

Dated September 16th 1909.

C. WHITE MORTIMER,
Administrator with the will annexed of the Estate of George Firman Baker, deceased.

First publication, Sept. 18, 1909.

A FOUR DAY LINER.

The Lusitania Adds to the Many Record Breaking Events

This is an age of wonders, and great achievements come thick and fast. Following the remarkable flights of the aeronauts in France came the news of the discovery of the north pole, and recently a steamship, the Lusitania, added to the record breaking events of the twentieth century by making the first four day trip across the Atlantic.

Never before have passengers crossed the Atlantic so quickly as did those who stepped ashore when the Lusitania reached New York recently. They had clipped a day from the ocean barrier. They had set a new standard for

CAPTAIN TURNER OF THE LUSITANIA.

speed. They had smashed all previous records for transatlantic travel. They were the first voyagers to leave London on Saturday and Queenstown on Sunday and arrive in New York on Thursday.

For a quarter of a century science, skill and unlimited expenditure have been striving for the prize captured recently by the Lusitania. The six day boat set the early records more than twenty-five years ago. The five day boat came along ten years later, but this is the first time that passengers from Queenstown have been landed in New York in four days. The new record time from Daunt's rock to the lights is 4 days 11 hours 42 minutes, and the Lusitania's average speed on this trip was 25.85 knots an hour.

GUNNISON TUNNEL INAUGURAL

Opening of Reclamation Service Features of Taft's Visit to Colorado.

One of the most interesting features of President Taft's coming visit to Colorado will be the turning on of the water through the Gunnison tunnel. This ceremony will be held at Montrose Sept. 23, and Mr. Taft will open the gates that will let the waters of the Gunnison river into the tunnel and will put this great reclamation project of Uncompaggre valley into operation. It will irrigate 150,000 acres of choice land that now is semiarid.

The government began the work four and a half years ago, and the two gangs boring the tunnel met July 6 last at a point 10,812 feet from the intake of the Gunnison river. The tunnel is 30,000 feet (six miles) long, 11 by 13 feet inside measurement, and is lined throughout with cement. The main canal is thirty feet wide at the bottom, eighty-three feet wide at the top, and the average depth of water is ten feet. The capacity is 1,800 cubic feet of water a second.

The cost of the tunnel and distributing canals is more than \$5,000,000, and perpetual water rights will be sold to actual settlers at approximately \$35 an acre, being based upon the actual cost of the tunnel. Ten years' time will be allowed for payment without interest. The lands to be irrigated are suitable for fruit growing and the raising of all kinds of farm crops. The water after it leaves the tunnel will have 370 feet fall, which can be used to generate electric power sufficient to light and provide power for all industrial purposes of the valley.

USE FOR THE NORTH POLE.

E. C. Pickering Suggests a Weather Bureau Station There.

Professor Edward C. Pickering, director of the Harvard college observatory at Cambridge, Mass., says that science does not care whether Peary or Cook actually reached the pole itself and suggests using the north pole as a United States weather bureau.

Professor Pickering says: "Whether both Commander Peary and Dr. Cook have actually stood on the spot that represents the northern end of the earth's axis is of no real importance to science. With the instruments they carried the best that could be expected is that they have been approximately at the north pole or, say, a mile or so from the spot."

"The delicate observations and calculations necessary to determine the exact position of the pole can never be made until a meteorological station of some sort is established near the pole, and I think the United States government could best take full advantage of the splendid work of these two explorers by sending up into the north a floating meteorological station aboard a ship equipped like Nansen's Fram that could enter the arctic ice pack and in three years drift across the region, while a body of scientists on board made the observations and collected data."

"More than this, I think that now that the public interest is aroused it would be well to remember that the United States government could keep a floating station of the weather bureau always in the polar region by sending two or three ships out at intervals of a year or so in order that as one ship was drifting away from the top of the world another would be approaching it."

IN VERRAZZANO'S MEMORY.

Will Erect Statue to Italian Said to Have Seen Hudson River First.

Ground was recently broken in Battery park, New York, for the foundation for a monument to Giovanni da Verrazano, the Italian explorer who is credited by Italians the world over with having discovered the Hudson river nearly a century before Henry Hudson.

Preceded by a band, a committee of Italians paraded down Broadway and marched to the place selected for the statue. Here they were met by Chevalier Charles Barsotti, president of the committee, and Ettore Ximenes, who designed the bust. After the band had played the Italian national hymn Chevalier Barsotti said in part:

It affords me pleasure to break the ground for a monument to the memory of Giovanni da Verrazano, who was the real discoverer of the Hudson river. The ground on which this monument is to be erected is doubtless the same over which Verrazano trod in 1494.

After the discovery by Columbus of America in 1492 the Cabots surveyed the coast of the new world, but in 1494 Verrazano came to New York and saw the Hudson river. The New York Geographical society has a copper globe of the earth made in 1547, which shows the Hudson river and the lands adjacent labeled "Verrazano, or New Gallia." This globe was discovered in an old Spanish convent, and its authenticity is undoubted. Data now in the possession of the New York Geographical society prove conclusively that Verrazano discovered the Hudson river eighty-four years before the arrival of the man whose name the river now bears.

The statue is now in the mold at the

Bertini Roman Bronze Works at New York, N. Y. It is said to be a fine representation of the oil portrait of the discoverer. On Oct. 6 it will be dedicated with considerable pomp by the various Italian societies of New York.

Kansas Farmers Racing Their Autos.
An automobile endurance race over three rounds of fifteen miles each through the country was the feature of a recent farmers' festival at Chapman, Kan.

"Pinched the Pole."

We's done it,
And done it slick!

With prompt dispatch
We've turned the trick,
Won a glory

Without dole,
The eagle screams,
"We've pinched the pole!"

For centuries others
Had a thirst,
None satisfied,

To see it first,
Creation's best,
We've beat the whole.

We saw it first,
And pinched the pole.

Now 'tis revealed
To human eyes,
The goal of ages.

Long sought prize,
Ecstatic bliss
Now fills our soul.

All tried—we got there—

Punch Bowl Full of Dollars.
Favorable comment is made at the navy department on a suggestion made by a citizen of Detroit concerning the use of the silver punch bowl which is to be presented by the state of Michigan to the new battleship of that name. The suggestion is that, instead of filling the bowl with punch or other liquor, it be filled with 1,000 silver dollars, to be contributed annually by the citizens of Michigan, for division into purses for distribution as prizes to the men of the ship having the best records at target practice, including all kinds of firing.

Halley's Comet.

Good comet, that with fiery tail
Will sweep the midnight sky,
While star dust, as the grains from flail,
Across the spaces fly—

Good comet, tell us where you've been
As ages rolled apace,
What glowing star saw you begin
Your jones and dreadful race.

A trillion miles you go with doom,
The knowledge strikes us dumb,
Or we would say, "Excuse us, please,
But that is going some."

Remember, earth is but a dot
Among a countless horde,
Control your tail while near the spot
Nor sweep us overboard.

LOMBARD PIANOS

The Pianos With The Sweetest Tone

Praised by Press and Pulpit

No Piano has ever been more enthusiastically endorsed. The Artistic Case, the Easy, Responsive Action, and above all the deep, sweet, rich tone, captivates performer and listener. The united verdict is that

LOMBARD PIANOS ARE THE BEST IN THE WORLD !!

Mrs. Helen M. Slaker, 244 Grand Ave., Aurora, Ill., says: "I cannot find words in the English language to express my appreciation to you for having sold me such a beautiful instrument. I really think it is the most beautiful case I ever saw, and the tone is simply grand. I shall be glad to give you any testimonial, as I think the Lombard should take the lead."

Rev. Geo. Doubleday, Pres. Corpus Christi College, Galesburg, Ill., says: "We are using the Lombard in our College work at Corpus Christi, and it is a pleasure to recommend it. It is a beautiful instrument with a deep, sweet, rich tone."

J. W. Purcell, Editor McNairy County Independent, Selmer, Tenn., says: "The instrument (Lombard Piano) fills out most sanguine expectations. It is not only a rare beauty in outward finish, but the tone is loud, full, rich and sweet. Your firm has proven to be prompt and reliable in its dealings with me."

J. Ernest Pearson, Editor Press, Parkersburg, Pa., says: "I must say that the Lombard sent me is a beautiful instrument, and a credit to a standard firm. We are more than satisfied."

R. S. Knapp, President Federal Charter Co., Washington, D. C., says: "We now realize after a careful and comprehensive trial of the Lombard by many musical artists of Washington, that it stands second to none, regardless of price or make. Every one who has tried this instrument is enthusiastic in its praise."

These are samples of hundreds of enthusiastic letters received in every mail.

Do Not Buy a Piano Until You Have Investigated the Lombard.

We send the Lombard Piano to any reliable party on 10 days' free trial. It may be paid for by easy monthly or quarterly payments. Credit will be given to suit any honest customer. A discount allowed for all cash.

GALESBURG PIANO CO.,
MANUFACTURERS. GALESBURG, ILL.

See the editor of this paper for further information about the Lombard Piano, and a special opportunity to get one almost FREE. Some one will get the bargain of his life.
